

Coordinators Instruction for Mosaic Template:

Print template & photocopy enough for 2 squares per child

Cut out squares on half the sheets & leave the others intact.

Distribute one square per child & allow children to create colourful pictures. Encourage children to fill entire square.

Put child's name on front of art square in black pen not too close to border.

Collect Children's work and stick each square picture onto the sheets you left intact.

*For best results use double sided tape.

*Ensure artwork is lined up accurately.

Artwork will be compiled and placed on the front and back covers in random order.

Depending on the number of art pieces some squares will be a colour block. (see website for example)

*To use this square allow children to draw on back.

Mosaics only work well with a maximum of 50 squares on the front and 50 on the back covers.
